*Re: Notice of Withdrawal as Lead Administrator for the U.S. Cyber Trust Mark Program;  
Cybersecurity Labeling for the Internet of Things (PS Docket No. 23-239)*

Dear Chief Nakazawa:

UL LLC (“**UL Solutions**”) has been honored to serve as Lead Administrator for the U.S. Cyber Trust Mark Program (the “**Program**”). We are the American safety science leader with a history that goes back more than 130 years. UL Solutions’ service as Lead Administrator has allowed us to support the FCC’s goals of prioritizing cybersecurity in consumer IoT products and protecting American consumer safety.

Over the last year, we have worked diligently and collaboratively to make significant progress supporting the FCC’s objectives for the Program and fulfilling the Lead Administrator role. We have convened and led a broad-based stakeholder process to develop recommendations for the technical requirements, market surveillance practices, and rules for the design and use of the Program label, among other initiatives.

We appreciate our ongoing discussions with the FCC about the future direction of the Lead Administrator role and the Program. Having now delivered many of the foundational elements of the Lead Administrator role and given other considerations, we respectfully submit our notice of withdrawal as Lead Administrator effective as of the date of this letter.

UL Solutions appreciates the FCC’s efforts to deliver a voluntary labeling program that advances IoT security and consumer safety. We remain committed to the success of the Program and look forward to working with the FCC to provide continued support and assistance as necessary to enable a seamless transition of remaining Lead Administrator activities to the FCC or its designated representative.

Thank you for the opportunity to contribute to this important initiative.

Sincerely,

/s/

Chanté Maurio  
VP and GM, Identity Management and Security
